

Nathan E. Hultman

Class of 1992

- **University of Maryland**
Associate Professor
Director of the Environment and Energy Policy Program at the School of Public Policy
- **Pacific Northwest National Laboratory**
Associate Director Joint Global Change Research Institute
- **The Brookings Institution**
Fellow, Global Economy & Development Program

Nathan Hultman embodies the ultimate expression of what any school would want of its alumni: a graduate who continues to develop his talents and then uses those talents to be a part of “the solution.” Nathan’s expertise lies in merging science and public policy to seek bold responses for the global problems of environment and poverty. Dating to the Kyoto Conference in 1997, Dr. Hultman has been an active participant in the United Nations’ response to climate change. His research focuses on international climate policy, green growth innovations, and private sector decisions to undertake low-carbon energy investments. His projects address the effectiveness of energy and environmental technology and policy in emerging economies such as Brazil, India, Korea, and South Africa as well as the United States. Such transformational innovations are green, healthy, affordable, and personal. Simply put, Nathan promotes ideas and initiatives that provide sustainable solutions to global challenges within local markets.

Great change takes place one step at a time. Nathan Hultman is becoming a pathfinder guiding us through our rapidly evolving world.
